EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gerlinde Nattler on 25 February 2011.

The application has been amended as follows:

Please cancel claim 17.

Please change the dependency of claim 15 from "14" to --20--.

Please change the dependency of claim 16 from "15" to --20--.

Please change the dependency of claim 18 from "17" to --14--.

In claim 22, please change "...adjustment of a ride level..." to --adjustment of the ride level--.

Please rewrite claim 14 as follows:

Claim 14. A method for controlling the functions of an electronic driving stability program for a motor vehicle with air springs, with an air spring control device, and with a body and at least two wheeled axles, the method comprising the steps of

determining through the air spring control device if at least one of the following two conditions applies: at least one of the wheeled axles is driven on a wedge of

Art Unit: 3664

accumulated roadway material; the vehicle is in a lifted platform situation in which the vehicle's weight is supported by the vehicle body and at most one axle;

generating a deactivation signal if it is determined that at least one of the two conditions applies, and

deactivating the driving stability program in response to the deactivation signal, wherein the determination of whether at least one of the two conditions applies is carried out by means of distance sensors and wherein a deactivation signal is generated for a given wheel when an associated air spring is not pressurized and the distance between the bottom of the vehicle and at least one member of the group consisting of an underlying surface, the wheel axle associated with the vehicle wheel, and the vehicle wheel itself, exceeds a predefined set point value.

Please rewrite claim 20 as follows:

Claim 20. A method for controlling the functions of an electronic driving stability program for a motor vehicle with air springs, with an air spring control device, and with a body and at least two wheeled axles, the method comprising the steps of

determining through the air spring control device if at least one of the following two conditions applies: at least one of the wheeled axles is driven on a wedge of accumulated roadway material; the vehicle is in a lifted platform situation in which the vehicle's weight is supported by the vehicle body and at most one axle;

generating a deactivation signal if it is determined that at least one of the two conditions applies, and

deactivating the driving stability program in response to the deactivation signal,
wherein the determination of a lifting platform situation is carried out in connection with
a ride level compensation device performing a ride level control method which is
suitable for detecting a situation in which the motor vehicle is raised on a lifting platform.

Please rewrite claim 21 as follows:

Claim 21. The method according to claim 20 for a vehicle with a drive engine,
further comprising the steps of filling the air springs with compressed air to an initial
level when a lifting platform situation is detected, and prohibiting any adjustment of the
ride level compensation device if the drive engine of the vehicle is switched off.

2. The following is an examiner's statement of reasons for allowance: The prior art
of record does not teach or render obvious the limitations of claims 17 or 20 in
conjunction with amended claim 14. US Patent Number 6,937,928 to Capito renders
obvious the limitations of claim 14 alone, however does not provide the limitations of
claims 17 or 20, and any rejection made would be based on improper hindsight
reasoning.

Any comments considered necessary by applicant must be submitted no later
than the payment of the issue fee and, to avoid processing delays, should preferably
accompany the issue fee. Such submissions should be clearly labeled "Comments on
Statement of Reasons for Allowance."

Art Unit: 3664
